Binangonan, Rizal, Philippines | janngonzalesgil@gmail.com | 0961-552-7543 | linkedin.com/in/jjggxxii

SUMMARY

NetSuite Technical Consultant with 4 years of experience delivering SuiteScript solutions (User Event, Client, Suitelet, Map/Reduce, RESTlet) for financial process automation, transaction customization, and system migrations. Backed by 6+ years of prior web development experience (HTML, CSS, JavaScript, WordPress) building and maintaining client-facing sites end-to-end. Combines strong JavaScript fundamentals, API/integration experience, and a web-development background to deliver both back-end automation and front-end/UI work.

TECHNICAL SKILLS

NetSuite: SuiteScript 2.x, User Event, Client, Suitelet, Map/Reduce, RESTlet, Advanced PDF/HTML Templates, Custom Records & Forms, GL Customization, Workflow Automation

Web Development: HTML, CSS, JavaScript, WordPress, WooCommerce, responsive design, theme/plugin customization

General Technical: SQL, XML, JSON, Git, debugging & performance optimization, cross-functional collaboration

EXPERIENCE

Technical Consultant Apr 2022 – May 2026

OGIS Philippines Inc. — Makati City

- Delivered NetSuite implementation and customization projects across financial automation, transaction customization, and migration engagements as part of a collaborative consultant team.
- Developed and maintained SuiteScript solutions (User Event, Client, Suitelet, Map/Reduce, RESTlet) that automated manual business processes, reducing processing time and minimizing human error across client workflows.
- Customized NetSuite transactions — including Vendor Bills, Invoices, Journal Entries, and Credit Memos — improving transaction accuracy and supporting clients' business growth post-implementation.
- Designed and delivered Advanced PDF/HTML templates for transaction forms and reports, replacing manual document preparation and saving clients recurring hours of formatting work.
- Built and managed custom records, fields, and forms to support complex, client-specific business requirements across finance and operations modules.
- Implemented automation for financial processes, intercompany transactions, and custom GL logic, reducing reconciliation errors and improving system reliability.
- Troubleshot and optimized underperforming scripts, improving execution speed and overall system stability across multiple client environments.
- Collaborated with functional consultants to translate business requirements into scalable technical solutions, ensuring smooth delivery across all project phases.

In-House Programmer Aug 2015 – Apr 2018

OP Networks Inc. — San Juan City

- Managed and maintained the company's e-commerce website (openpinoy.com), covering both front-end and back-end code.
- Updated and modified existing code to improve functionality and user experience; debugged and resolved technical issues to ensure smooth site performance.
- Collaborated with team members to implement new features and enhancements.

Junior Web Developer Mar 2013 – May 2015

RSY Global Web Development — Taytay, Rizal

- Designed and developed client websites, including corporate and e-commerce sites, using HTML/CSS and WordPress CMS.
- Implemented e-commerce functionality using the WooCommerce plugin and customized themes/plugins to meet client requirements.
- Ensured website functionality, performance, and responsiveness across devices.

EDUCATION

Diploma in Computer System Design and Programming

ACLC College — Taytay, Rizal • 2010 – 2012
